## **DETAILED ACTION**

1. Claims 4-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim may not be a base claim for another multiply dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,203,999 to Hugues ("Hugues").
- 4. As to claims 1, Hugues teaches a liquid treatment means (abstract) comprising a separation device (2 and 4, See Fig. 1) for a soiled liquid mixture which as been supplied with intaken air

and a cleaned liquid tank (1) which is connected to it for cleaned liquid, characterized in that the separation device and the cleaned liquid tank form a structural unit and the separation device for the soiled liquid mixture is surrounded at least in areas by the water tank for the cleaned water (See Figs. 1).

5. As to claim 2, the two chambers are arranged essentially concentrically (See Figs 1).

Application/Control Number: 10/560,240 Page 3

Art Unit: 1797

6. As to claim 3, the separator has a sump reservoir for the settled particulate material (4, see Fig. 1).

- 7. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. U.S. Patent No. 5,312,551 to Perron et al. ("Perron").
- 8. As to claim 1, Perron teaches a water treatment means, especially for a sewer cleaning vehicle (abstract, and Fig. 1), comprising

a separation device (56, 58 and 60, combined, see Fig. 1, and col. 2 lines 45-50) for a mud-water mixture which has been supplied with intaken air and

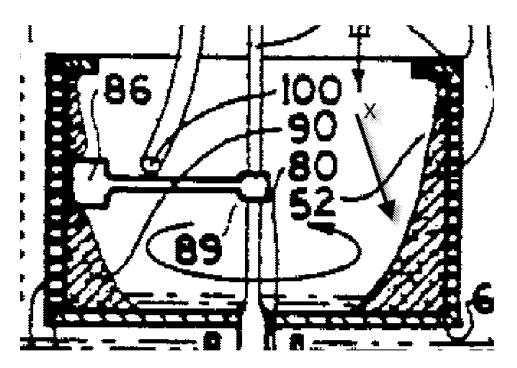

a water tank (74 and 69, see Fig. 1, and col. 2 lines 55-60) which is connected to it for cleaned water.

characterized in that the separation device and the water tank form a structural unit and the separation device for the air-mud-water mixture is surrounded at least in areas by the water tank for the cleaned water (See Fig. 1, and col. 2 lines 50-65).

- 9. As to claim 2, the Perron shows that the separating centrifuge and the stationary shield, which forms the cleaned water tank are concentrically arranged (See Fig. 1).
- 10. As to claim 3, Perron provides a reservoir area in the separation device for the collection of mud during the separation. See Figure below where "X" points to the reservoir area in the separation device for collection of the settled mud.

Application/Control Number: 10/560,240

Art Unit: 1797

## Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. 4,199,837 to Fisco, Jr. teaches a sewer cleaning vehicle with a mud separator where the clean water tank and mud settling tank are slightly offset from concentric; see Figs 2 and 3.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lucas Stelling whose telephone number is (571)270-3725. The examiner can normally be reached on Monday through Thursday 12:00PM to 5:00PM.

Art Unit: 1797

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on 571-272-1166. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
